

Thank you Penguin Random House for letting me read this novel and be a Puffin ambassador. I have enjoyed reading this novel in class and at home over the last few weeks.

The part that the author did well was in the descriptions. For example the way that that author described the story it felt like it was happening right in front of you.

I really liked the book because it had adventure and a bit of science fiction. The Sci- fi part usually means something futuristic or set in the future and this book was set when the second ice age hit. I liked the characters because the authors described everything about so you could really imagine what they were like and what they looked like.

There was also pictures throughout the novel to help me picture the characters and scenes.

The people that would like this book would like adventure stories and people that would like things that are set in a futuristic world.

I would recommend this book to 7+ because it is a story for all ages. It would even be a good book for a teacher to read aloud to a class.

**Jack, age 10, Canterbury**
