

\*SPOILERS HAVE BEEN REDACTED\*

This book is a great read and I would definitely read it again. It is full of moments where I was on the edge of my seat, desperate to hear more and more. I think the author did really well on making it feel like you were actually there. I would be reading and all the noise and distraction from around me disappeared, that's how good the book Unadoptables is!

I would say if you're between 9 and 13 and absolutely love an adventurous exciting book then this book is definitely for you. My favourite part of the story would have to be the part where [REDACTED]  
[REDACTED] The book is so exciting and makes me want to keep reading it again and again and never ever stop.

My star rating is 4 out of 5, I couldn't find many faults in this book but I have read other books that I love to read even more. On the scale of my favourite books this book is coming in third place! I am sure lots of other people would love this book as much as I do. I have read lots of other book series but there is none I'm reading at the moment so I would absolutely love it if a second one came out. I love this book so much.
