

Spoilers redacted

I love this book for its suspense and thrills! (I read the whole thing in one day because I could not put it down!) My favourite part was when Stella and Seth realise [REDACTED]

This was my favourite part because it was a surprise and I was not expecting it to happen! I think the author did well with the page turning storyline and the awesome characters!

I also think the author did well in keeping my attention and not one part of the book was boring. It was all amazing!

I loved the book because it was very captivating and had an easy story to follow. Another reason is that it had a lovely ending and I wished the book never ended!

I think the age group for this book would be 10-15 because under 10 may not understand some of the parts and over 15 may think it is easy to read. The type of people who might like this book are readers who like mystery and magic, also someone with a good imagination!
