

I really enjoyed reading this book because of all the excitement that was built up within it. As soon as I finished a couple chapters I couldn't stop reading it!

Coming from an 11 year old who loves to read more horror type books I couldn't put it down. It was the perfect book for down time, or just reading generally throughout your day.

Towards the end was my kind of book with the half horror, half tension etc. The characters suited their role perfectly and I loved Stella's character. She was very straight forward, kind and brave. The main character, Seth, was very suitable for the book. He was kind, considerate and reflective.

The book features memory eating trolls, a haunted garden and an interesting plot line. The author did really well describing the characters and setting the scene quite nicely. I would recommend this book to the age group of 10 - 13. It's a perfect time killer and piqued my interest and it would surely interest others. I rate it around 9.5/10.
