Snotty Maze

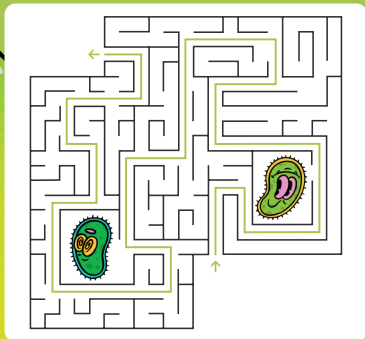

Can you find your way out of this sticky snotty mess?

What if... you didn't make snot?

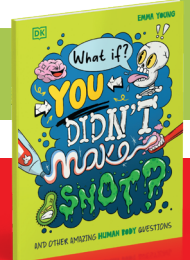

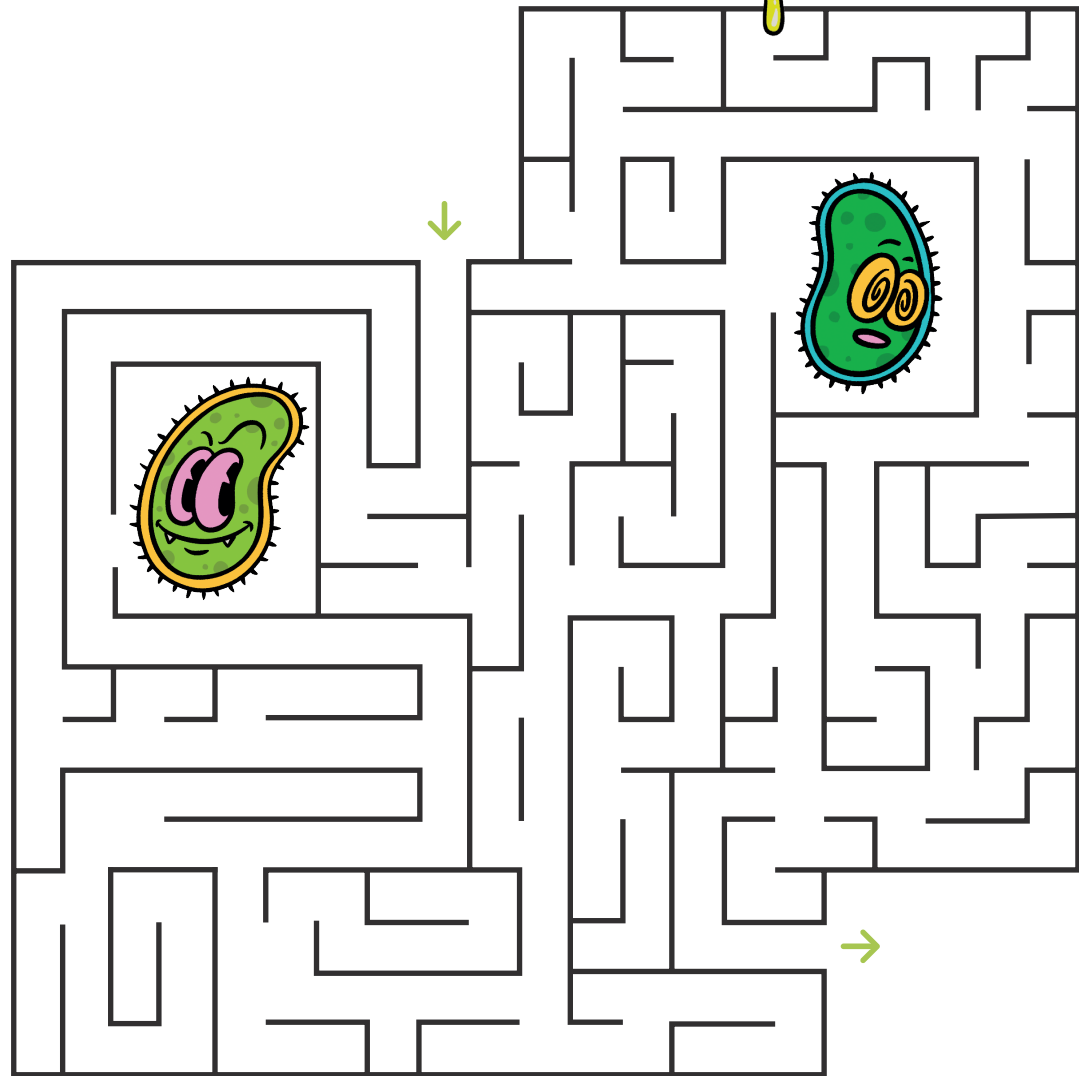

The answer?

Slimy snot is crucial for good health. If you didn't make it, your nose would dry out. Your nose would soon get sore and you'd start having nosebleeds. Also, you'd get more infections, so you'd be sicker.

ANSWER:

Every day you produce a litre (about four tall glasses) of snot.

Wordsearch

Can you find the following words amongst an exploding volcano?

Volcano, Ash, Erupt, Sulphur, Lava, Tectonic

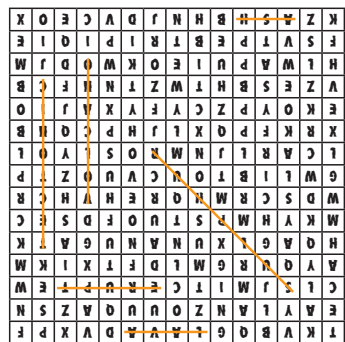

Volcanic bombs are lumps of hot rock that come hurtling out of a volcano.

What if every volcano erupted at once?

The answer?

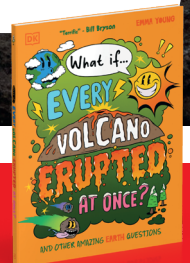

Spewing lava would cause problems for people living near volcanoes – but not just them. All the ash would form a thick cloud that would spread around the planet, blotting out the Sun.

Also, gas from the eruptions would turn rain into ACID. In the end, most living things would be wiped out!

Spot the Difference

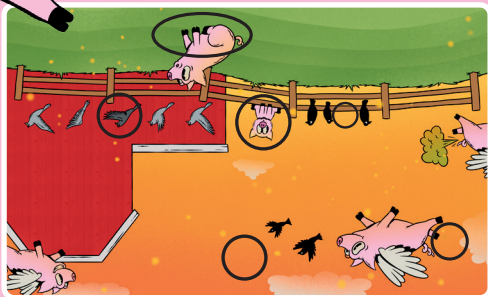

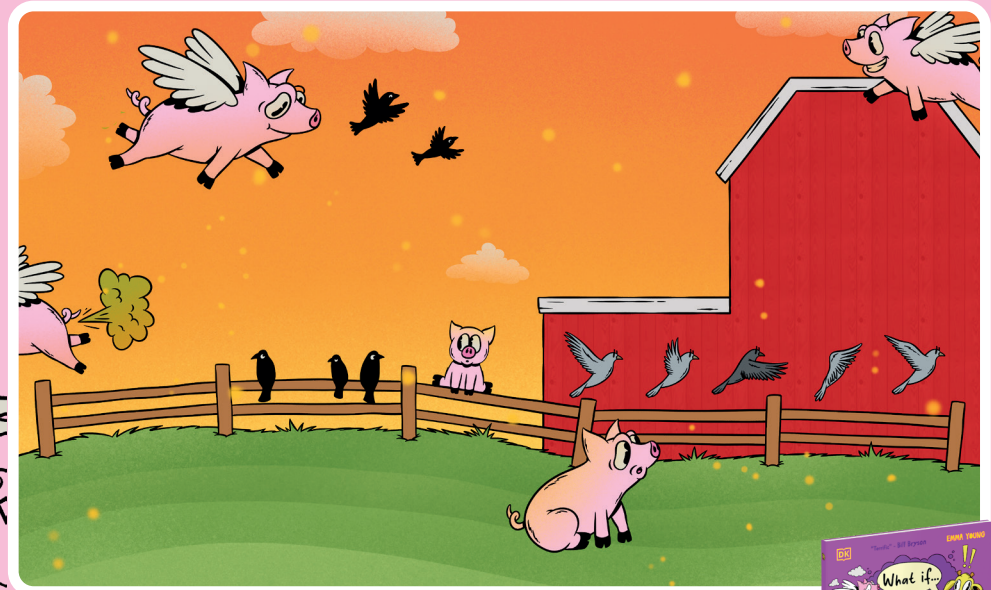

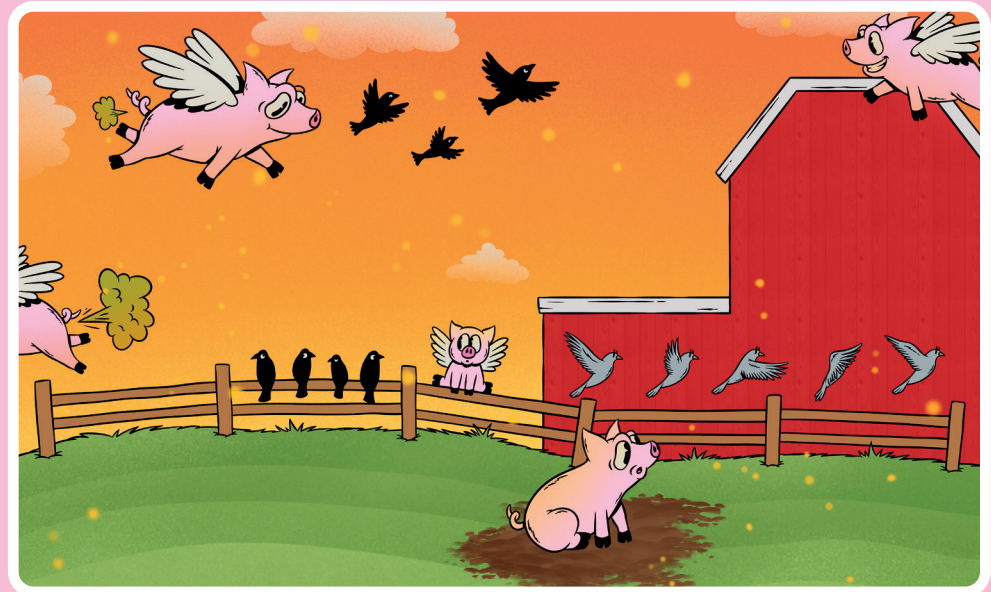

Can you find the 6 differences between these two images?

What if...
pigs could fly?

The answer?

Pigs just don't have the body shape for flight. Even a pig with wings as long as a bus wouldn't be able to take off. If they could fly, though, you'd have to watch out for their droppings!

Ostriches are
the heaviest
birds in the
world, but they
can't fly.
